**Subject:** Re: Follow Up Requested - RE: Request to be on Sept 5th agenda for Town Council Meeting

Politics aside, plans of this nature are expensive and have not been budgeted for this fiscal year. VDAP plan update monies were diverted for the SAPI.

In terms of a transportation plan update, we have been working off of the draft model since 2015 and getting periodic traffic counts. TIA's have been performed on the ABCZ and MALBEC projects, so spending money on a new downtown comprehensive transportation plan at this point would yield little new information and the cost does not justify the potential benefits.

>>>> On a separate note, I have shared the email thread that spurred my request. My intention is not to focus on my particular property but on the downtown area as a whole. I just wanted you know understand why I'm raising this now. Last week when I did see information on the Town of Holly Springs engineering or planning site, there was a reference to 17-SEU-04 which included the image below with the blue map. The letter I received on Friday after I sent the email with the attached blue map referenced the same 17-SEU-04 project but the area highlighted no longer included the corner adjacent to my property. Can someone explain how why there has been a change in the 17-SEU-04 so that the corner of my lot is no longer part of 17-SEU-04?

>>>> The blue map has been removed from the web site since I sent my email on Friday.

>>>>

>>>>

>>>>

>>>> My questions are how set are these plans? I did see the list of participates when the plan was adopted in December of 2005 but wonder what follow up was done with that advisory group or other village residence since that initial plan? The last revision of the plan was done in 2013 which states there were updated maps and graphics along with associated text. I'm most concerned about the section 2.3 Transportation, Access & Circulation section. The introduction paragraph references data that the town collected in June 2005 and observations of traffic flow based on that timeframe. I have also done through the Comprehensive Transportation Plan <http://www.hollyspringsnc.us/629/Comprehensive-Transportation-Plan> June 2011. Of interest was Figure 3.3 <http://www.hollyspringsnc.us/DocumentCenter/View/7751> dated 2013<<http://www.hollyspringsnc.us/DocumentCenter/View/7751%20dated%202013>>.

>>>>

>>>>

>>>>

>>>> I heard from Aaron that the town is proposing to close the end of Raleigh near my house. I have looked throughout the web site and through the plans and documents mentioned above and have not found that stated as a project that is in process. I also had the chance to speak to Dan Berry at the Derek Davis race Saturday to ask about the closure of Raleigh street. He was not aware and he is on the planning board. I'm can't speak to the fact that this was discussed at the planning board and he missed that conversation due to travel.

>>>>

>>>>

>>>>

>>>> Given how many new developments have been approved that will feed directly into our downtown traffic, and the impact of the traffic from the by-pass that is increasing the volume of traffic in the downtown area, I will be asking to be on the agenda for Sept 5th for the town council. My request will be for the town council to vote on approving an initiative, similar to the SAPI, to conduct a full traffic study of the entire village district prior to making major changes to the roads like closing the end of Raleigh Street.

>>>> Hi Kendra and Gina,

>>>>

>>>> I had a call Aaron on June 14th about a road project on Raleigh Street asking for a survey to be done on our yard. I did call him back and he briefly discussed this project with me. He could not say at the time whether the proposed plans would impact our yard. I did share how the sidewalk project caused some grief (mainly with the level of communication we had from the town) and had hoped that this project would go smoother. My request was for the town to provide more transparency with the plans so that we can be aware of any impact to our property ahead of time.

>>>>

>>>> He had asked to survey our lot, which I gave verbally over the phone. He said that he would email me a form to approve and attach the preliminary plans. He mentioned that by the law, the town could send us a form and survey without our approval if we didn't give permission. I told him that wasn't necessary and that I would not cause the town that extra effort. I've looked everywhere in my email and have not found any emails from Aaron or engineering. If he send one, can you resend to this email? If he didn't send one, can you send me the information about the proposal?

>>>>

>>>> I know I did speak with Gina a the planning session at the Hunt Center a while back and she could not share what the plans were that might impact my lot, but said engineering could help.

>>>>

>>>> I want to assure you that I fully support development downtown and know that our house is situated in a location where it may need to be impacted by these plans. It is vital that we improve our downtown area to help our local businesses and improve this as a destination for all. I did see the information on 17-

SEU-04 and read through the material. It did not mention the corner for Grigsby and Raleigh specifically so it is unclear to me how our home or the traffic flow around our home might be impacted with this proposal. We have not received any more information beyond the call from engineering in June and what I have found by searching on the town website.

>>>>
